PROFESSIONAL SUMMARY

Third-year Information and Communication Technology undergraduate at the University of Colombo seeking a Network Engineering internship. Project experience with OSPF, VLANs, DHCP, port security and SSH in Cisco Packet Tracer, plus AWS EC2 application deployment using Docker, Jenkins, Nginx and HTTPS. Completed training in AWS cloud fundamentals and network security. Interested in network implementation, troubleshooting and infrastructure support.

EDUCATION

Bachelor of Information and Communication Technology Honours

University of Colombo - Faculty of Technology | 2023 - Present

Third-year undergraduate

RELEVANT TRAINING AND CERTIFICATES

- **AWS Cloud Practitioner Essentials** | AWS Training and Certification | October 2026
- **Network Security & Database Vulnerabilities** | IBM / Coursera | October 2026
- **Getting Started with Cisco Packet Tracer** | Cisco Networking Academy | February 2026
- **Computer Networks and Network Security** | IBM | April 2026
- **Learning Linux Basics Course & Labs** | KodeKloud | February 2026
- **AWS Academy Graduate - Cloud Architecting** | Amazon Web Services | May 2026

ADDITIONAL TRAINING

- **API Testing with Postman** | Learnfi | May 2026
- **Web Design for Beginners** | University of Moratuwa | February 2026
- **PHP and MySQL for Web Application and Web Development** | Udemy | January 2026
- **Beginner's Guide to GitHub** | Alison | December 2025

TECHNICAL SKILLS

- **Networking:** Cisco Packet Tracer, OSPF, VLANs, IP subnetting, DHCP, ACLs, sticky MAC port security, SSH and wireless access points
- **Systems and Cloud:** Linux, AWS EC2, security groups, Docker, Docker Compose, Jenkins, Nginx and HTTPS configuration
- **Programming and Web:** Java, JavaScript, PHP, Python, C#, HTML, CSS, React and Tailwind CSS
- **Databases and Tools:** MySQL, SQL Server, MongoDB Atlas, Firebase, Git, GitHub, Visual Studio Code, Android Studio and Postman

SELECTED PROJECTS

Enterprise Network Architecture

Technologies: Cisco Packet Tracer, OSPF, VLANs, DHCP, SSH

- Built a three-floor hotel network with eight VLANs, OSPF routing and DHCP.
- Configured port security, SSH and wireless access; troubleshot connectivity issues.

Source code: Project repository

Secure Full Stack E-commerce Platform

Technologies: AWS EC2, Docker Compose, Jenkins, Nginx, React, Node.js, MongoDB Atlas

- Deployed a containerized e-commerce application on AWS with automated Jenkins deployments.
- Configured security groups, Nginx, HTTPS, Google OAuth and environment-based secrets.

Links: Source code | Live website

GemLink - Rough Gem Marketplace

AWS EC2 | University project - In development

- Deployed a university marketplace project on AWS EC2 to connect rough gemstone sellers in Ratnapura with interested buyers.
- Planned scope includes buyer/seller accounts, stone and lot listings, search, inquiries and admin listing moderation.

UniMate

Technologies: Java, XML, Firebase Authentication, Cloud Firestore

- Developed an Android task manager with secure authentication and real-time CRUD.
- Added live search, task priorities and light/dark themes.

Source code: Project repository

Sarasavi Library Management System

Technologies: C# .NET, SQL Server

- Built a desktop library system with borrowing, returns, reservation alerts and book search.
- Implemented validation and error handling.

Source code: Project repository

SOFT SKILLS

Problem Solving and Analytical Thinking | Team Collaboration
Adaptability and Fast Learning | Creativity and Innovation

LANGUAGES

Sinhala - Native | English - Intermediate
